

Today's Featured Activity: There's no EARTH without ART!

Today we're going to make some art, because there is no EARTH without art! Many of these activities can be done with things you may have around your house, or natural items you can gather on your walk. Please be mindful of where and what you're collecting for the nature, there may be rules about taking things from sites.

- Create a colorful recycled paper collage using magazines or all the scraps of paper left over from another project. Some ideas are an **Earth collage** or draw the outline of your favorite animal **this butterfly** and fill it in with wild colors!
- Create **critters out of nature** items like pine cones and milkweed pods.
- Make **a suncatcher** out of natural and recycled items.
- This time of year there are a lot of birds flying around, sometimes they mistake the reflection in the window as another place to fly. Make bird friendly **window decorations** so they can see where not to fly!

- Using either things you find in nature (acorn caps, sticks, pebbles) or recycled items from your house (bottle caps, tin can or jar lids) you can make a musical **wind chimes**.
- If you don't have the materials to make these other crafts, why not make temporary nature art like a fairy house or gnome home! Check out some ideas on our Facebook.
- You can also find an **activity sheet** with word search, crossword puzzle, and coloring that you can print from our website. No matter what you do to create Earth Day Art, please share with us what you made and a little story behind why you made what you did.
