

Today's Featured Activity: Bubbles!

Can you say bubbles without smiling, I know I can't! This time of year, what better outside activity than blowing bubbles and chasing after them? With supplies you likely have around your house you can make a variety of wands, blowers and art with homemade bubble solution.

- While dish soap and water mixed together will provide you with a decent amount of bubble fun, the addition of sugar can make these bubbles more stable and if you have some winter gloves, you're even able to catch them in your hands! Use [this recipe](#) here, for great results! If you have corn syrup at home, this recipe is good for making [giant bubbles](#)!
- If you can't seem to find any of last years bubble wands, why not try making some? When you're out on a walk collect some sticks from the ground to make these [stick wands](#).
- If you'd like to make giant bubbles, try [these wands](#), using either sticks and strings, or straws!

- Have you ever tried to make different shaped bubbles? Do **different shaped** bubble wands make a difference? Here you can learn how to make **a square bubble!**
- Using an old water bottle and sock you can make **bubble snakes!**
- Have you ever tried **bubble painting**? You will definitely want to do this activity outside and with old clothes on!
